Worlds of History, Volume Two: Since 1400

A Comparative Reader

Bedford/St. Martin's Assembled by award-winning community college teacher and distinguished world historian Kevin Reilly, the documents in the best-selling Worlds of History bring history alive for students. Students read voices from the distant and more recent past that address topics and issues -- like patriarchy, love and marriage, and imperialism -- of enduring interest and relevance. Ranging widely across regions and cultures, each chapter takes up a major theme and asks students to examine it in the context of two or more cultures, encouraging them to make cross-cultural connections and comparisons. The flexible comparative and thematic framework easily accommodates the variety of approaches instructors bring to teaching world history while supporting the general goal of cultivating critical thinking skills.

World History

World History, 4th edition, recounts the story of mankind from creation to the present. Students examine ancient civilizations through the Greeks to the Roman Empire. Then they survey India, Asia, and Africa on their way to the Middle Ages, the Renaissance, and the Reformation, upon which modern history is founded. They are challenged to discover the forces, issues, people, and movements that have shaped our modern world. God's providence and Bible integration are given prominence as the students are taught to view the world through a Christian lens. - Publisher.

The Industrial Revolution in World History

Routledge The industrial revolution was the single most important development in human history over the past three centuries, and it continues to shape the contemporary world. With new methods and organizations for producing goods, industrialization altered where people live, how they play, and even how they define political issues. By exploring the ways the industrial revolution reshaped world history, this book offers a unique look into the international factors that started the industrial revolution and its global spread and impact. In the fourth edition, noted historian Peter N. Stearns continues his global analysis of the industrial revolution with new discussions of industrialization outside of the West, including the study of India, the Middle East, and China. In addition, an expanded conclusion contains an examination of the changing contexts of industrialization. The Industrial Revolution in World History is essential for students of world history and economics, as well as for those seeking to know more about the global implications of what is arguably the defining socioeconomic event of modern times.

Teaching to Change the World

[Routledge](#) This is an up-to-the-moment, engaging, multicultural introduction to education and teaching and the challenges and opportunities they present. Together, the four authors bring a rich blend of theory and practical application to this groundbreaking text. Jeannie Oakes is a leading education researcher and former director of the UCLA teacher education program. Martin Lipton is an education writer and consultant and has taught in public schools for 31 years. Lauren Anderson and Jamy Stillman are former public school teachers, now working as teacher educators. This unique, comprehensive foundational text considers the values and politics that pervade the U.S. education system, explains the roots of conventional thinking about schooling and teaching, asks critical questions about how issues of power and privilege have shaped and continue to shape educational opportunity, and presents powerful examples of real teachers working for equity and justice. Taking the position that a hopeful, democratic future depends on ensuring that all students learn, the text pays particular attention to inequalities associated with race, social class, language, gender, and other social categories and explores teachers' role in addressing them. The text provides a research-based and practical treatment of essential topics, and it situates those topics in relation to democratic values; issues of diversity; and cognitive, sociocultural, and constructivist perspectives on learning. The text shows how knowledge of education foundations and history can help teachers understand the organization of today's schools, the content of contemporary curriculum, and the methods of modern teaching. It likewise shows how teachers can use such knowledge when thinking about and responding to headline issues like charter schools, vouchers, standards, testing, and bilingual education, to name just a few. Central to this text is a belief that schools can and must be places of extraordinary educational quality and institutions in the service of social justice. Thus, the authors address head-on tensions between principles of democratic schooling and competition for always-scarce high-quality opportunities. Woven through the text are the voices of a diverse group of teachers, who share their analyses and personal anecdotes concerning what teaching to change the world means and involves. Click Here for Book Website Pedagogical Features: Digging Deeper sections referenced at the end of each chapter and featured online include supplementary readings and resources from scholars and practitioners who are addressing issues raised in the text. Instructor's Manual offers insights about how to teach course content in ways that are consistent with cognitive and sociocultural learning theories, culturally diverse pedagogy, and authentic assessment. The Eagle and the Dragon

Globalization and European Dreams of Conquest in China and America in the Sixteenth Century

John Wiley & Sons In this important new book the renowned historian Serge Gruzinski returns to two episodes in the sixteenth century which mark a decisive stage in global history and show how China and Mexico experienced the expansion of Europe. In the early 1520s, Magellan set sail for Asia by the Western route, Cortes seized Mexico and some Portuguese based in Malacca dreamed of colonizing China. The Aztec Eagle was destroyed but the Chinese Dragon held strong and repelled the invaders - after first seizing their cannon. For the first time, people from three continents encountered one other, confronted one other and their lives became entangled. These events were of great interest to contemporaries and many people at the time grasped the magnitude of what was going on around them. The Iberians succeeded in America and failed in China. The New World became inseparable from the Europeans who were to conquer it, while the Celestial Empire became, for a long time to come, an unattainable goal. Gruzinski explores this encounter between civilizations that were different from one another but that already fascinated contemporaries, and he shows that our world today bears the mark of this distant age. For it was in the sixteenth century that human history began to be played out on a global stage. It was then that connections between different parts of the world began to accelerate, not only between Europe and the Americas but also between Europe and China. This is what is revealed by a global history of the sixteenth century, conceived as another way of reading the Renaissance, less Eurocentric and more in tune with our age.

The Daily Show (The Book)

An Oral History as Told by Jon Stewart, the Correspondents, Staff and Guests

Grand Central Publishing **NEW YORK TIMES BESTSELLER** The complete, uncensored history of the award-winning **The Daily Show** with Jon Stewart, as told by its correspondents, writers, and host. For almost seventeen years, **The Daily Show** with Jon Stewart brilliantly redefined the borders between television comedy, political satire, and opinionated news coverage. It launched the careers of some of today's most significant comedians, highlighted the hypocrisies of the powerful, and garnered 23 Emmys. Now the show's behind-the-scenes gags, controversies, and camaraderie will be chronicled by the players themselves, from legendary host Jon Stewart to the star cast members and writers-including Samantha Bee, Stephen Colbert, John Oliver, and Steve Carell - plus some of **The Daily Show's** most prominent guests and adversaries: John and Cindy McCain, Glenn Beck, Tucker Carlson, and many more. This oral history takes the reader behind the curtain for all the show's highlights, from its origins as Comedy Central's underdog late-night program to Trevor Noah's succession, rising from a scrappy jester in the 24-hour political news cycle to become part of the beating heart of politics—a trusted source for not only comedy but also commentary, with a reputation for calling bullshit and an ability to effect real change in the world. Through years of incisive election coverage, passionate debates with President Obama and Hillary Clinton, feuds with Bill O'Reilly and Fox, and provocative takes on Wall Street and racism, **The Daily Show** has been a cultural touchstone. Now, for the first time, the people behind the show's seminal moments come together to share their memories of the last-minute rewrites, improvisations, pranks, romances, blow-ups, and moments of Zen both on and off the set of one of America's most groundbreaking shows.
